

Django Models for Job Portal Website

```
from django.contrib.auth.models import AbstractUser
from django.db import models
```

1. User Model (AbstractUser with role-based access)

```
class User(AbstractUser):
    USER_TYPE_CHOICES = (
        ('job_seeker', 'Job Seeker'),
        ('company', 'Company'),
        ('admin', 'Admin'),
    )
    user_type = models.CharField(max_length=20, choices=USER_TYPE_CHOICES)
```

2. User Profile Model (Extended for Job Seekers & Companies)

```
class UserProfile(models.Model):
    user = models.OneToOneField(User, on_delete=models.CASCADE, related_name='profile')
    contact_number = models.CharField(max_length=15, blank=True, null=True)
    linkedin = models.URLField(blank=True, null=True)
    website = models.URLField(blank=True, null=True) # For companies
    bio = models.TextField(blank=True, null=True)
```

3. Resume Model (For Job Seekers)

```
class Resume(models.Model):
    job_seeker = models.OneToOneField(UserProfile, on_delete=models.CASCADE, related_name='resume')
    resume_file = models.FileField(upload_to='resumes/')
    skills = models.TextField(help_text="Comma separated skills")
    experience_summary = models.TextField(blank=True, null=True)
```

4. Job Model (For Job Listings)

```
class Job(models.Model):
    company = models.ForeignKey(User, on_delete=models.CASCADE, related_name='jobs', limit_choices_to={'user_type': 'company'})
    title = models.CharField(max_length=255)
    description = models.TextField()
    requirements = models.TextField()
    job_type = models.CharField(max_length=50, choices=[('full_time', 'Full Time'), ('part_time', 'Part Time'), ('remote', 'Remote')])
    salary_range = models.CharField(max_length=100, blank=True, null=True)
    location = models.CharField(max_length=255)
    posted_at = models.DateTimeField(auto_now_add=True)
    application_deadline = models.DateTimeField()
```

5. Job Application Model (For Tracking Applications)

```
class JobApplication(models.Model):
```

```
    job = models.ForeignKey(Job, on_delete=models.CASCADE, related_name='applications')
```

```
    job_seeker = models.ForeignKey(User, on_delete=models.CASCADE, related_name='applications', limit_choices_to={'user_t
```

```
    applied_at = models.DateTimeField(auto_now_add=True)
```

```
    status = models.CharField(max_length=50, choices=[('applied', 'Applied'), ('reviewed', 'Reviewed'), ('rejected', 'Rejected'), ('ac
```

```
# 6. Saved Jobs Model (For Bookmarking Jobs)
```

```
class SavedJob(models.Model):
```

```
    job_seeker = models.ForeignKey(User, on_delete=models.CASCADE, related_name='saved_jobs', limit_choices_to={'user_t
```

```
    job = models.ForeignKey(Job, on_delete=models.CASCADE, related_name='saved_by')
```

```
    saved_at = models.DateTimeField(auto_now_add=True)
```

```
# 7. ATS Score Model (For Resume Evaluation)
```

```
class ATSScore(models.Model):
```

```
    application = models.OneToOneField(JobApplication, on_delete=models.CASCADE, related_name='ats_score')
```

```
    score = models.IntegerField(help_text="Score out of 100")
```

```
    missing_keywords = models.TextField(blank=True, null=True)
```

```
    feedback = models.TextField(blank=True, null=True)
```

```
# 8. Interview Model (For Scheduling Interviews)
```

```
class Interview(models.Model):
```

```
    application = models.ForeignKey(JobApplication, on_delete=models.CASCADE, related_name='interviews')
```

```
    scheduled_date = models.DateTimeField()
```

```
    meeting_link = models.URLField(blank=True, null=True)
```

```
    status = models.CharField(max_length=50, choices=[('scheduled', 'Scheduled'), ('completed', 'Completed'), ('cancelled', 'Canc
```

```
# 9. Notification Model (For User Alerts)
```

```
class Notification(models.Model):
```

```
    user = models.ForeignKey(User, on_delete=models.CASCADE, related_name='notifications')
```

```
    message = models.TextField()
```

```
    created_at = models.DateTimeField(auto_now_add=True)
```

```
    is_read = models.BooleanField(default=False)
```
